I-125 Radioactive Seed: Typical Dimensions

We can make it happen.

In office prostate seed implantations or brachytherapy is a reality.

- **Imagine** being able to offer your patients with locally confined prostate cancer an option to receive curative therapy in your office utilizing all the state of the art equipment and expertise that can be found in any major hospital.
- **Imagine** the incredible cost savings, convenience, and safety for your patients
- **Imagine** that with little to no investment in time or money, your office can be trained and prepared for in-office prostate seed implants within a matter of weeks.

We can make it happen.

Piedmont Prostate Center is your brachytherapy specialist. Dr. John Leung, board certified radiation oncologist with over 10 years of prostate seed implant experience, has created an exciting program for in-office brachytherapy.

Proven Patient Safety and Satisfaction.

In office prostate seed implants has been

practiced in several centers since 1999.

Hundreds of

patients have

Most implant procedures are completed within one hour.

undergone in office brachytherapy with

proven efficacy and

satisfaction. Tolerance is extremely good

and better than that of a prostate biopsy.

Join the growing number of urology clinics

in North Carolina offering the next standard

of care for prostate brachytherapy.
